Products for Prevention of Fleas, Ticks, Heartworm, & Some Internal Parasites

** It is recommended by the American Heartworm Society that heartworm prevention be used year round. As with any heartworm preventative medications, pets must be tested for heartworms prior to starting them on a preventative. In a small percentage of treated dogs, digestive and neurological side effects may occur. In cats, safety studies at up to 10 times the label dose did not detect any adverse drug reactions. More information on why we test and why we recommend preventatives can be found at <http://www.heartwormsociety.org/pet-owner-resources/faqs>.*

Revolution®

(Fleas, heartworm, & some internal parasites)

Revolution® is a topical solution that can be used on cats who are 8 weeks of age or older and on dogs who are at least 6 weeks of age. It is dispensed in small single-dose tubes which are specific to the species and weight of your pet and should be applied once a month. Revolution® is the only topical treatment available which is labeled for the prevention and control of adult fleas, flea eggs, heartworm disease, ear mites, hookworms, roundworms, and sarcoptic mange. Because it is labeled for heartworm, additional heartworm preventatives are not needed when Revolution® is used. It can also be used for tick control, although it is not officially labeled for that purpose. It is manufactured and distributed by Pfizer Corporation. Revolution® has proven to be very safe and effective and can be safely used in conjunction with a flea and/or tick collar for additional protection.

Frontline® Tritak™

(Fleas and ticks)

Frontline® Tritak™ is a topical solution labeled to kill fleas, flea eggs, flea larvae, ticks, and chewing lice. It is available for both dogs and cats over 12 weeks old. (****Do not use product labeled for dogs on cats.***) It is dispensed in small single-dose tubes which are specific to the species and weight of your pet and should be applied once a month. It is manufactured by Merial Corporation and has been proven to be quite safe. Frontline® Tritak™ should be applied once a month.

Trifexis™

(Fleas, heartworm, & some internal parasites)

Trifexis™ is a monthly, chewable tablet for dogs that kills fleas, prevents heartworm disease, and treats and controls adult hookworm, roundworm and whipworm infections. Trifexis™ combines two trusted active ingredients (spinosad and milbemycin oxime) to provide protection for your dog against these three kinds of dangerous parasites.

Tri-Heart Plus©

(Heartworm & some internal parasites)

Tri-Heart Plus© is given to dogs once a month for the prevention of heartworm disease. Tri-Heart Plus© also protects against hookworms and roundworms in dogs.
